

I have been an avid listener of radio for all of my life. I am 48 yrs old and live in California. I also have been a listener of XM Radio now for the past 9 months and TOTALLY love the choices I have. I still listen to AM/FM broadcasts and just found out that COGRESS is looking into limiting my choices because lobbyists believe XM steps into mainstream radio areas. This is absurd! DO NOT let huge conglomerates such as Clear Channel dictate how America should listen to radio. DO NOT let lobbyists limit my choice of music news sports and weather on whatever method that I chose to listen. XM provides me with countless choices of music etc. I NEVER have a problem with reception and I totally love the format and use it daily. Please reject NAB's petition 04-160 and let people who pay for this wonderful service to continue.
